1. Other wavelengths on request.
2. Expected output power. Can varies based on current and temperature.
3. Specification are subjected to chips availability.
4. Voltage from the power supply must be higher, as due to high current there will be a voltage drop in the cables.
5. Pitch dependent

### No Mechanical Stress

Our patented solder-free technology is used in our diode bars stacks. Thanks to it clamped bars expand and contract freely during the thermal cicles of the pulsed regime avoiding mechanical stress.
